PROFESSIONAL EXPERIENCE

Mar 2024 - Present

Full Stack Web Developer
Haat Global And IT Communication Riyadh Saudi Arabia

- Designed and implemented backend **APIs** and frontend components for **HaatSign**, a secure digital signature platform for government clients.
- Built and optimized **PDF** upload and verification modules, ensuring compliance with national e-signature standards.
- Improved **API** response and data handling efficiency by approximately 30 percent through query optimization and asynchronous operations.

Feb 2023 - Jan 2024

Full Stack Developer
Baramdat Solutions Islamabad Pakistan

- Led end-to-end development of **Camp Portal** and **Reservation System** integrating **Laravel** backend with **React** frontend.
- Automated reporting and scheduling workflows, reducing administrative workload by 25 percent.
- Collaborated with designers to improve **UX** and mobile responsiveness across all user interfaces.

Dec 2021 - Jan 2023

Laravel Developer
Silver Concepts LLC Islamabad Pakistan

- Built and enhanced **University Management System** modules including **Hostel, HR, Library, and Transport**, serving 5K+ users.
- Developed modular backend components and **APIs** for real-time synchronization across departments.

PROJECTS

HaatSign

- Present Stack-Fin ERP

Dec 2025 - Apr 2026

Designed and implemented a secure, end-to-end digital signature workflow for PDF documents, enabling seamless signing, verification, and archival for government agencies. The system enhanced document integrity, reduced processing times, and ensured compliance with legal and regulatory standards in Saudi Arabia.

Developed a modular ERP system from scratch in PHP for Marsoom Company, integrating inventory, procurement, and financial operations into a unified platform. Implemented a double-entry accounting system for sales, purchases, and expenses, automated financial reporting (P&L, ledgers), and role-based access control (RBAC) to ensure secure and efficient business workflows.

Camp Portal & Reservation System

University Management System (UMS)

Developed a comprehensive full-stack solution for managing camp accommodations, meal planning, and participant feedback collection. The platform streamlined operational workflows, improved staff coordination, and enhanced the overall camper experience while providing administrators with real-time reporting and analytics.

Created a centralized, web-based platform for managing student and faculty data, academic records, and administrative tasks. The system improved reporting accuracy, reduced administrative overhead, and enabled better coordination between departments and faculty members.

Applyupp

Whyi Platform

Built an online admissions tracking platform that simplified the student application process and enhanced communication between applicants and institutions. The system provided intuitive dashboards, automated notifications, and reporting tools that improved institutional efficiency and user experience.

Developed a Laravel-based multi-level marketing platform with integrated loyalty programs and tiered user roles. The platform enabled seamless tracking of user hierarchies, rewards, and commissions, while providing a robust backend to manage business logic and reporting for marketing teams.

Future Deals

Sofftlie website

Designed and implemented a digital franchise platform that connected businesses with potential investors, facilitating streamlined partnerships. The platform enabled franchise management, investment tracking, and communication tools, supporting business growth and operational efficiency in the UAE market.

Developed a comprehensive web platform for comparing mobile phone prices, exploring detailed specifications, and accessing informative articles to guide users in making well-informed purchasing decisions. Implemented features to provide accurate and up-to-date product information, intuitive search and filter functionality, and a seamless user experience, enabling users to quickly compare models, evaluate options.

Baladi Express

Developed a full-featured e-commerce platform for Baladi Express, enabling seamless online shopping, product browsing, and order management for customers in Qatar. Implemented secure payment gateways, inventory management, and a user-friendly interface to enhance the shopping experience.
